

The KamiCare fall management solution is the most accurate, affordable, and easy to install fall detection system.

kamiCare

Fall Management Solution

With KamiCare, falls are detected in real-time and false alerts are eliminated.

Caregivers and staff are notified immediately - reducing the risk of serious injuries caused by falls while improving fall prevention practices.

Outcomes Achieved with KamiCare

Falls can be **attended** to and **treated** more **quickly**

Occupancy rate can be **improved**

Resident's **length of stay** can be **increased** by avoiding hospitalization

KamiCare Core Benefits

99%* fall detection accuracy

Eliminates false alerts

Instant alerts: email, SMS, or phone call

Privacy protected

Plugs into a standard electric outlet

Uses existing Wi-Fi

Do it yourself installation

Scalable for any size facility

*based on internal test

How KamiCare Works

1

The fall sensor runs AI continuously to detect falls

2

Once a fall is detected, a blurred and encrypted video is sent to the KamiCare expert center for verification

3

Upon confirmation, an alert is immediately sent to the designated caregiver(s) for the appropriate course of action

KamiCare Respects The Individual's Privacy

The sensor transmits the fall video clip for review, only when a potential fall is detected.

The transmitted videos are blurred to protect privacy.

All videos are encrypted using bank level encryption.

KamiCare compared to other fall alert systems

Wearable devices

Easy to forget to wear or recharge

Radar sensors

Unreliable technology

Bed alarms

High false alarm rates
